Instructions:

1. Determine all the data attributes included on the menu (around 5). For each attribute, determine the type (categorical, ordinal, or quantitative).
2. Develop some possible derived attributes, along with their type (try for 5-10).
3. Given the attributes identified in #1 and #2, build a table/spreadsheet to hold the attributes and the data.

Submission:

- Create a google sheets document (share and add names)
- On one sheet provide meta data (i.e., #1 and #2 from the instructions). Each attribute should have a short name, a type, and a brief description.
- Create a second sheet (same document) to hold the data (i.e., #3 from the instructions)
- Provide a link to your google sheet. Be sure to properly set permissions so that we can access it.
